- Governmental projects and tenders .

FUTURE IN OUR EYES

VISION

Kayan is a sister company for NTS, a well-established contracting company in the Saudi market with more than 10 years of continuous success especially our cooperation with the Saudi ministry of youth.

With the same successful management, NTS was interested to expand its business scale & invade a new business sector.

Kayan aims to go beyond expectations in all aspects of what we do, to inspire audiences and be the most favorite company by delivering unforgettable experiences & premium quality .

MISSION

To provide the best-LED technology available and translate this into integrated solutions via tracking customers' needs and matching their needs with outstanding budget optimization .

VALUES

Business success comes from real business values, our permanently values are trust, customers dedication, and transparency.

WHY KAYAN

Delivering an outstanding quality accompanied with value diversity engineering is our strategy to satisfy our clients and acquire their loyalty.

We offer integrated solutions and make them especially fit with clients budgets.

We are not only interested to impress our clients at purchasing moments but also in offering the best after-sales services, maintenance, and technical support.

Our maintenance team covers all areas of Saudi Arabia approaching the latest technology solutions, obvious working speed, and providing all the needed spare parts at competitive prices.

We are always available and our support team is ready to get your complaints.

WORLD OF DIGITAL SCREENS

Billboards have been part of the landscape of many towns & roads, but customers are progressively immune to static advertising and marketers are forced to take more creative and innovative ways to enhance their impact.

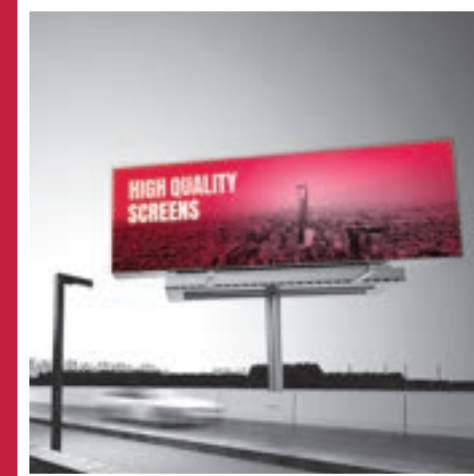

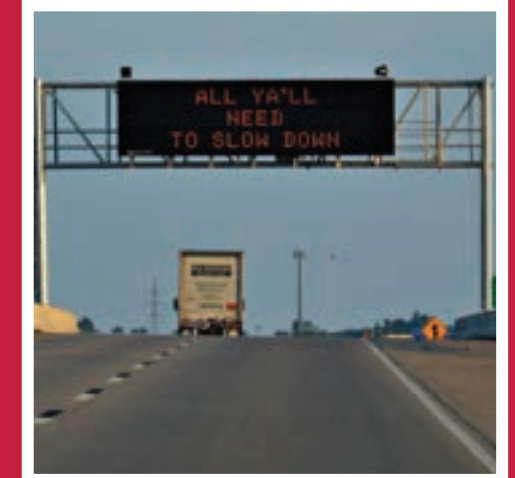

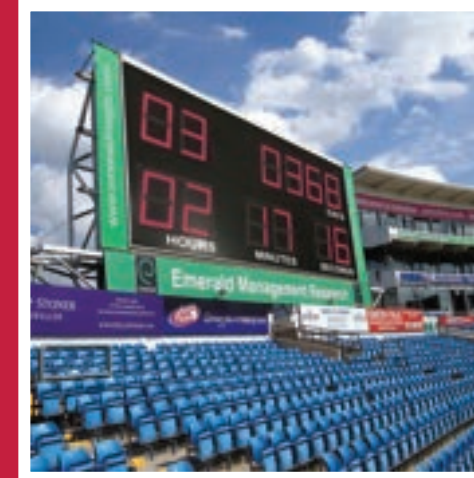

From there, a need for more innovative advertising was created. Digital signage offers the opportunity for clear and elaborate displays to promote your business.

Still, pictures are clearer & more organized. Animated screens appeal more effectively to the public.

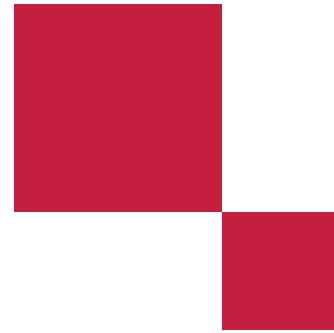

Audiences are more attracted to the latest impressive technology.

OUR PRODUCTS

- Outdoor Screens
- Indoor Screens
- Stadium Screens
 - . Boards
 - Electronic screens – scoreboards
 - Swimming Stadium System
- Fuel Price Boards
- Content Management Systems

OUTDOOR SCREENS

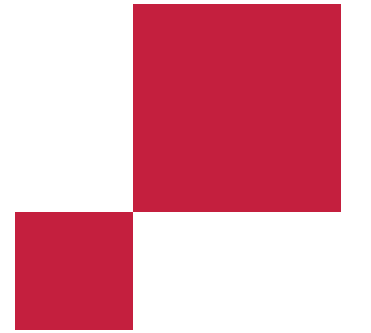

Considered one of the most attractive tools to deliver the advertising campaign's messages to your audience, matches with outdoor mood to display videos, written messages, or graphics. It comes in different sizes & designs.

The extra advantage is being portable and easy to be maintained or stored.

Most common applications Advertising for exhibitions, commercials, or events.

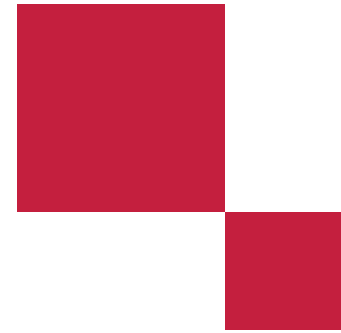

INDOOR SCREENS

Its accuracy & its high lighting intensity makes it the first choice for the biggest halls, lectures halls, and theaters.

It achieves the highest sales at schools, universities, closed halls, and theaters.

STADIUM SCREENS

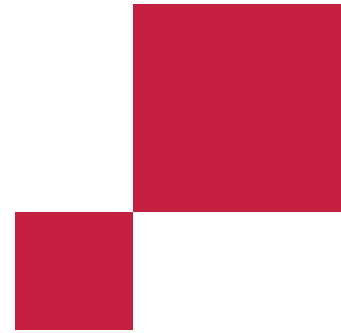

BOARDS

We study and detect the specific requirements of each facility whatever it is a closed or opened sports lounge.

We suggest suitable solutions as screens, software, or boards to display players' names, athletes, times, number of laps, and time differences.

Electronic Screens – score boards

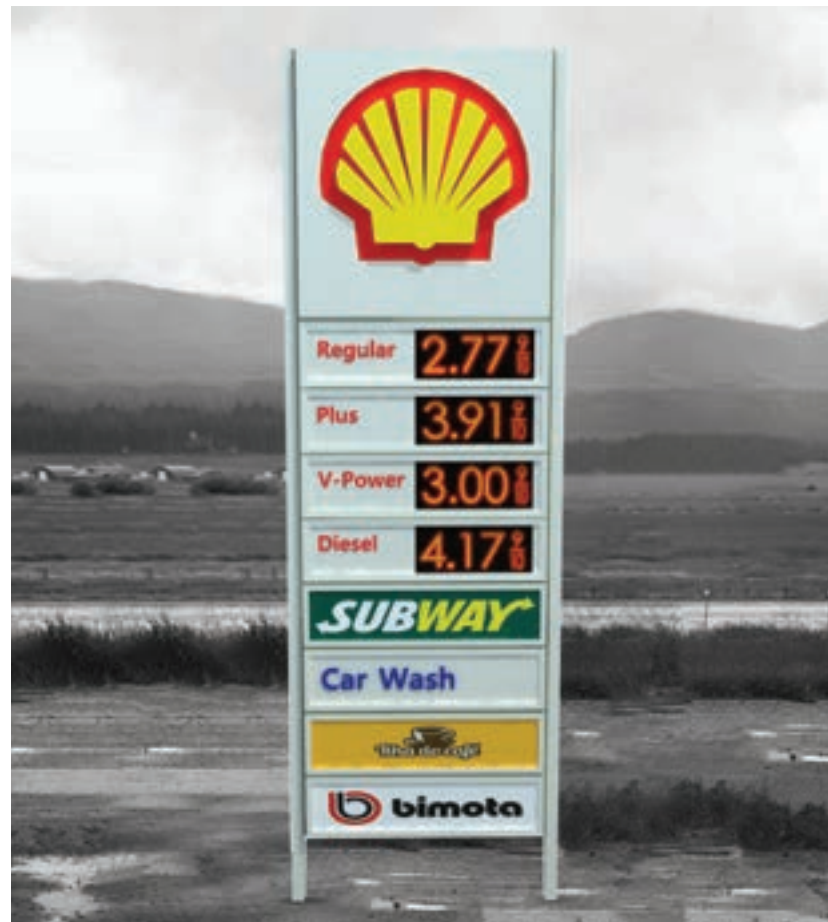

- International sports stadiums and club stadiums.
- Olympic sports stadiums.
- Lounges and swimming pools.
- Individual or group football gyms.

Swimming Stadium System

Has the ability to display the smallest details like players' names, track numbers, and exact time to access through the interactive electronic parts of the system, start launching and the starting whistle, and the players' platform that senses the moment the player starts.

FUEL PRICE BOARDS

It is customized to work in easily flammable places with high insight accuracy to be easily readable for drivers on the road.

Its Advantages

- Easy to be controlled.
- Adjustable for the clients' needs (colors and sizes).
- Resistance to external factors.
- Maintenance and warranty.

INTELLIGENT TRANSPORTATION SYSTEMS

The radar tracking system is one of its applications, used on the main roads and inside cities to measure traffic density and guide vehicles, it could also be available as a mobile application.

Screens are adaptable in smart transport areas where they can be used to expand applications to include international borders too.

Smart transport systems depend on many aspects,

- Radio communications.
- Computer technologies and software.
- Databases.
- Remote sensing techniques.
- Vehicle discovery and videography.
- System Inspection.
- Automated Reports .

MOBILE LED SCREENS

Mobile LED screen for every event

Open LED display trailer or mobile led screen with walls? Maybe looking for something bigger? LED screen in the container may be worth considering. A variety of products gives you the ability to choose the one that fit you best. Above all, every screen is custom-made to perfectly match your needs.
